## August is National Immunization Awareness Month (NIAM).

August is National  
Immunization  
Awareness Month

The goal of NIAM is to increase awareness about immunizations from infants to the elderly. Vaccines offer safe and effective protection from infectious diseases. By staying up-to-date on the recommended vaccines, individuals can protect themselves, their families and friends and their communities from serious, life-threatening infections. With all the kids heading back to school it is important to remember the benefits of immunization, not just for your children but for the community as a whole. Adults and the elderly should be up to date on immunizations as well. For more information please visit the CDC website @ [www.cdc.gov/vaccines/spec-grps/parents.htm](http://www.cdc.gov/vaccines/spec-grps/parents.htm)
